MUNDOTÊXTIL

Research, development and design

Mundotêxtil, a leader in the manufacture of terry towelling, invests in research, development and design to meet the needs of its customers. It combines product innovation with an improved quality of life and use in the items it develops.

The R&D team searches each and every day for solutions that are innovative, sustainable and differentiating. Examples of its excellence include the Vital@ Multivitamin, which includes a combination of vitamins E and C with ginger oil to strengthen the immune system, and CottonX™, a 100% natural cotton thread with copper particles that help maintain healthy skin.

TÊXTEIS PENEDO

Inspired by exceptional materials

From bed linen to items for the table and decor, the high quality of Têxteis Penedo's products has enabled it to consolidate a position of leadership in the industrial textiles field.

Inspired by exceptional materials, it has developed an innovative production method that makes it possible to combine fabrics with cork to create a flexible product made with natural material that offers many possible uses. Cork thread has a wide range of uses wherever design is particularly important, and it can be adapted for a number of industries, such as fashion, furniture, sports and mobility.

FILSTONE

Naturally solid

Filstone manufactures and sells innovative and sustainable cladding. STORK (stone and cork) is a fine example of this. This is a flooring and cladding solution that combines the characteristics of natural stone and cork, enhancing and respecting the properties of two of Portugal's finest natural raw materials.

The stone is lighter, stronger and has improved acoustic and thermal efficiency. The cork becomes even more premium and structured. This combination results in a unique product that is lighter, more resistant and durable, and which has countless applications.

BISELARTE

Innovation in glassware

The BISELARTE Glass Design Group is a leader in the glass sector, specialising in decorative glass and illuminated mirrors. It has a permanent commitment to innovation that combines technology, functionality and design.

Its two Innovation and Development centres are integrated into a network of scientific and technological partners and a certified RDI system which, combined with its know-how and flexibility of production, allow it to present differentiated, competitive and tailor-made products and solutions to the market, incorporating electronic components (sensors, Bluetooth, television) and LED lighting, as well as different finishes created using laser technology and digital printing.
